1 Placemore

The population is steadily growing. By 2050, it will have come close to 10 billion. At the same time - the number of urban dwellers is increasing. According to the UN forecast, after the next three decades it may exceed 2/3 of the global population. The scale of urbanization is impressive. Buildings multiply at an unprecedented pace. The fact that we need to share the urban space is becoming increasingly more visible.

How to shape a common space, taking into account that it is not only a physical area but also the space where cultures, ideas, and different lifestyles cross paths? The Placemore think-and-do tank is created by urban planners, architects, researchers, city designers and investors. It forms a network of professional practitioners who are ready to implement place-making projects. We team up to support social change and give rise to the formation of new spatial policies.

2

Contacts database
Strategic networking, acquiring project partners. Verified and updated database of members.

Training
Training in new methods and tools for place-making in cooperation with foreign partners and experts.

Knowledge
We share tools and knowledge between universities, businesses, local governments and NGOs. Cross-sectoral exchange of knowledge and case studies.

„By 2030, provide universal access to safe, inclusive and accessible, green and public spaces, in particular for women and children, older persons and persons with disabilities."
.....

„By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries."
....
United Nations 2030 Goals, Goal 11: *Make cities inclusive, safe, resilient and sustainable*
